Mechanical Specifications

Mini-Split Outdoor Unit

General

This unit is fully charged from the factory for Refrigeration system controls include up to 25 feet of piping. This unit is designed to operate at outdoor ambient temperatures High and low pressure controls are inheras high as 115°F. Cooling capacities with the ent to the compressor. A suction line mini-split air handler shown in the catalog are multi function service valve is standard AHRI certified. The unit is ETL listed for outdoor application.

Unit Casing

The unit casing is constructed of heavy total dipped hermetic motor windings. gauge, galvanized steel and painted with a Other features include: centrifugal oil weather-resistant powder paint.

Refrigerant Controls

condenser fan and compressor relay.

Compressor

The compressor features internal over temperature and pressure protection; pump and low vibration and noise.

Condenser Coil

The coil shall consist of aluminum finned coils brazed to copper tubing. The coil provides air flow resistance and efficient heat transfer. The coil is protected by the casing.

Low Ambient Cooling

Matched ductless products, have cooling capabilities at outdoor ambient temperatures as low as 0° F.

Mini-Split Indoor High Wall

General

The High Wall mounted type air handler shall be completely factory assembled including coil, condensate drain pan, fan motor, washable filter, air purifying filter and electric controls to be used with a wireless remote controller. Unit shall be shipped with a unit mounting plate. Unit shall be matched with an outdoor unit, rated and tested in accordance with AHRI standard. Unit shall be ETL listed.

Unit Casing

Casing shall be provided with knockouts on the right, and left of the unit to facilitate piping and electrical connection on either side of Units shall have the capability to be conthe unit. An electrical service cover shall be trolled remotely through wall-mounted provided to permit easy access to the electri- wired options (sold separately) as well cal terminal strip.

Discharge Airflow and Distribution System

Unit shall have auto swing, dual horizontal blades to optimize the aperture outlet for vertical airflow and air distribution. Blade shall close automatically when the air conditioner is turned off to minimize dust entering the unit. Five-Step preset program on the remote controller shall be available to control the blade angle.

Manually adjusted wide-angle louvers shall be provided to adjust the coverage and direction of airflow.

Controls

as a wireless remote option.

Remote Controller

The unit shall have a wireless infrared remote controller with easy reading digital display panel to start, stop and regulate the air conditioner from a distance.

The wireless controller is included with all units.

Healthy Filters

The unit shall have an active carbon and catechin filter with the unit. The filters need to be cleaned at least once a year.
